---

### Abstract

Water is not merely a chemical compound of hydrogen and oxygen. Water is the center of existence. In all religions and human traditions, water has been a symbol of purity, life, and spiritual cleansing. But more astonishingly, scientific research shows that water can respond to sound, words, and even human intention. This interdisciplinary paper introduces water as a living, intelligent being with memory. Drawing on Professor Gerald Pollack's theories on the fourth phase of water (EZ Water), Masaru Emoto's controversial research on the effect of emotions on water structure, recent University of Kobe (Japan) studies on the impact of sound frequencies on water, and the philosophical-numerical framework of AquaNumerica (Codes 3, 7, 12), we demonstrate that water can store energy, information, and even intention. By examining the place of water in Islam, Christianity, Judaism, Hinduism, and ancient traditions, we conclude that water is not only the source of physical life but also a

means of spiritual purification and a universal language connecting all humanity. As long as .water exists, the world will endure

---

## Introduction: Water, the Center of Existence .1

The Holy Quran states: "And We made from water every living thing" (Al-Anbiya 21:30). This verse does not merely refer to physical life; water is the source of everything. In the Bible (Genesis 1), the Spirit of God moves upon the face of the waters. In Hinduism, the Ganges River is the sacred mother and symbol of purity. In Zoroastrianism, water is one of the four .sacred elements and guardian of cosmic order

But water is not just the source of physical life. New research shows that water can hear, feel, and respond to our words. If words have the power to create, then speaking them over .water can transform the world

Today, 2.2 billion people lack access to safely managed drinking water, and 829,000 die annually from diseases caused by unsafe water [WHO 2026]. This statistic shows that our relationship with water is broken. Perhaps it is time to view water not as a resource, but as a .living, sacred, and listening being

---

## Water in All Religions: A Means of Spiritual Purification .2

### Islam: Water, Source of Purity and Life .2.1

:In Islam, water plays a central role in purification

.Wudu and Ghusl: Prayer is not accepted without purification with water ·

Zamzam Water: The holiest water for Muslims, which Emoto's research showed forms the ·  
. most beautiful crystals

.Paradise: Rivers of pure, flowing water ·

### Christianity: Water, Symbol of Rebirth .2.2

.Baptism: Cleansing from original sin and rebirth ·

.Jesus Christ walks on water and turns water into wine ·

.In Revelation, the "river of the water of life" flows from God's throne ·

### Judaism: Water, Purification and Life .2.3

.Mikveh: Water pool for ritual purification ·

.Talmud: Water is the source of life and purity ·

### Hinduism: Water, Life Itself .2.4

.Ganges River: The holiest site for Hindus; bathing in it cleanses sins ·  
 .Water symbolizes fertility, purity, and immortality ·

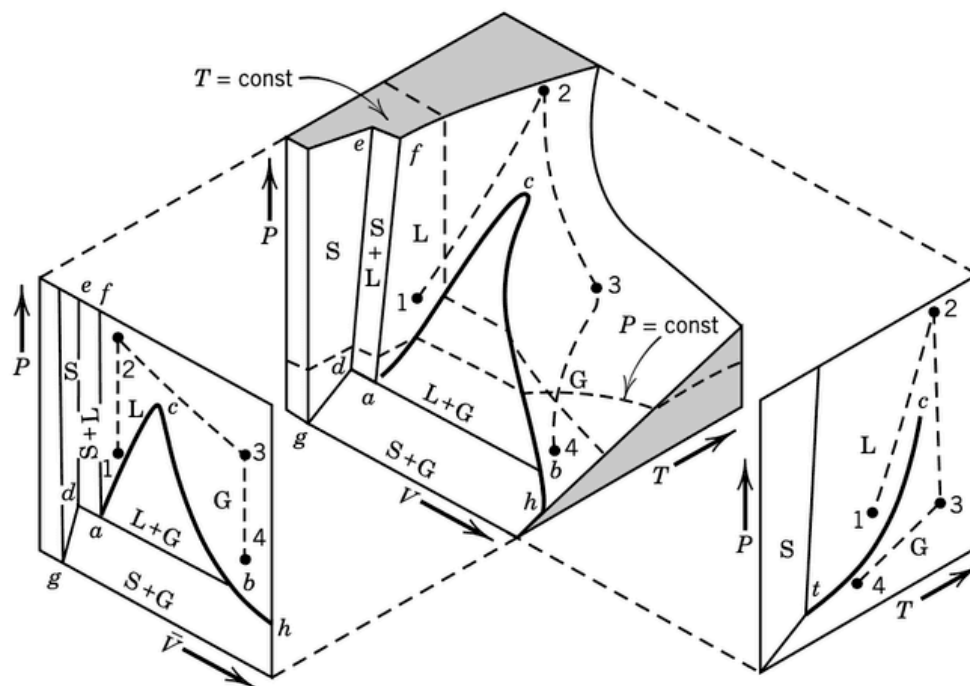

(Ancient Traditions (Zoroastrianism, Egypt, Greece) .2.5

Tradition Place of Water

(Zoroastrianism One of the four sacred elements (water, wind, earth, fire

Ancient Egypt The Nile River as the source of life and deification

Ancient Greece Oceanus as the great god and source of all rivers

**Figure 1.11**  $P$ - $\bar{V}$ - $T$  surface for a one-component system that contracts on freezing. (From K. E. Bett, J. S. Rowlinson, and G. Saville, *Thermodynamics for Chemical Engineers*. Cambridge, MA: MIT Press, 1975. Reproduced by permission of The Athlone Press.)

(Water Beyond H<sub>2</sub>O: The Fourth Phase of Water (EZ Water) .3

Professor Gerald Pollack of the University of Washington has proposed a revolutionary theory: water has not three phases (solid, liquid, gas), but four phases

Characteristics of EZ Water .3.1

Feature Description

(Alternative Name Exclusion Zone Water (EZ

Structure Hexagonal crystalline

(Electrical Charge Negative (up to -200 mV

Stability Extends hundreds of microns from hydrophilic surfaces

Pollack discovered that near hydrophilic surfaces, water creates a zone that excludes . suspended particles. This zone not only has an ordered structure but can also store energy

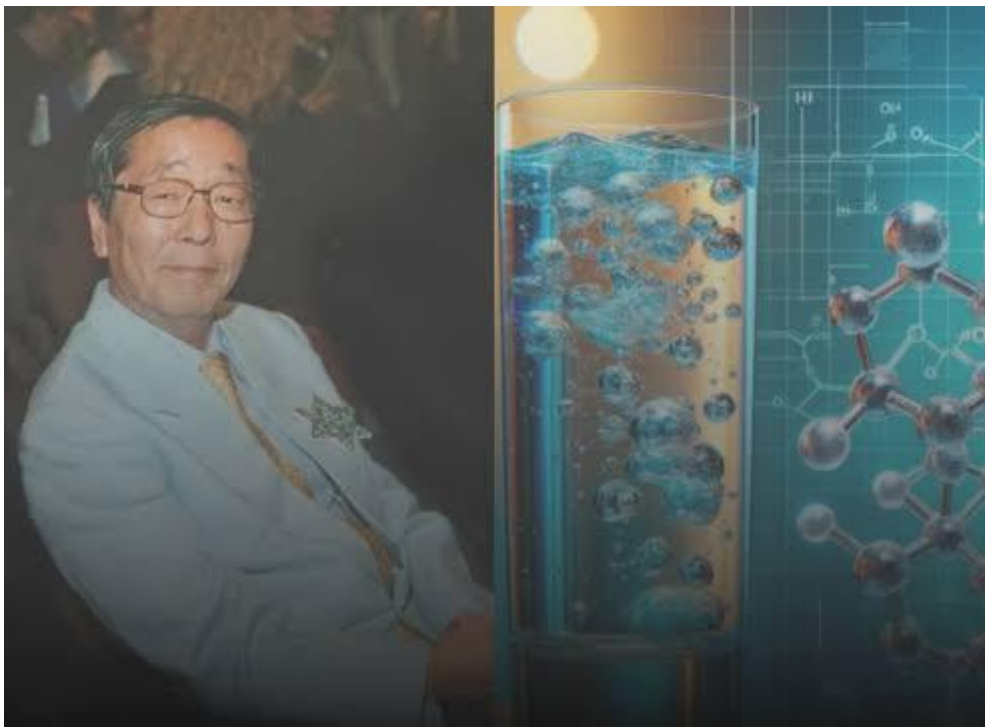

### EZ Charging by Light .3.2

According to Pollack's research, the fourth phase of water charges by absorbing light . (especially infrared). This means water acts like a natural battery

---

### The Effect of Sound and Words on Water Structure .4

#### Masaru Emoto's Research: Words Change Water .4.1

Dr. Masaru Emoto, a Japanese researcher, conducted revolutionary experiments in the 1990s. He exposed water to words, music, and prayers, then froze it and examined the . crystals under a microscope

(Stimulus Result (Crystal Image

Positive Words (Love, Gratitude) Beautiful, symmetrical, radiant crystals

Negative Words (Hatred, Fear) Irregular, chaotic, dark crystals

Prayer and Blessing Extremely beautiful and complex crystals

Classical Music (Beethoven, Mozart) Regular and beautiful crystals

Heavy Metal Music Damaged and irregular crystals

Zamzam Water The most beautiful crystals with radiant colors

Emoto states: "Water teaches us in a very clear way how we should live" . According to him, words express the human spirit, and the state of our spirit has a tremendous effect on the . water that makes up 70% of our bodies

#### The Power of Prayer and Collective Intention .4.2

In 1999, Emoto conducted an experiment at Lake Biwa in Japan. 350 people gathered by the lake and prayed together. Results showed the lake's water structure had improved. He . (calls this phenomenon "Kotodama" (the spirit of words

#### University of Kobe Research (2022): Scientific Confirmation of Sound's Effect on Water .4.3

In 2022, a research team from Kobe University published a study titled "Pilot Aquaphotomic :Study of the Effects of Audible Sound on Water Molecular Structure" . The results showed

.Water acts as a "collective mirror" influenced by all internal and external effects ·  
.Frequencies of 432 Hz and 440 Hz have different effects on water structure ·  
Sound can change water's molecular structure, increasing "ice-like water" and reducing ·  
. small water clusters

This research demonstrates that sound not only affects water but can also be used as a tool . to identify biological samples and even alter their function

#### Biological Response of the Body to Words .4.4

Dr. Candace Pert, a neuropharmacologist, discovered molecular receptors in the body responsible for experiencing emotions. Her research shows that body chemistry changes in response to repeated praise or criticism . According to her: "People's words evoke different . "emotions, and what we believe happens because of what we say to ourselves and others

The body immediately records words as emotions and responds. If someone constantly tells themselves "I am so fat," their body may resist weight loss . This means words have the .power to create reality

---

#### Water Has Memory: From Homeopathy to Creative Bubbles .5

##### Bubbles and Water Memory .5.1

Recent research shows that bubbles in water have memory and can oscillate for extended . periods. This property has been used in water-based AI systems

##### The Effect of Music on Water and Then on Humans .5.2

Just as water changes with sound, the water within our bodies also changes. Research by Dr. Abolfazl Gilaki shows that heavy music (heavy metal, death core) causes long-term

vibrational changes in water and can lead to physical and mental imbalance. In contrast, soft . and classical music regulates water structure and brings peace

---

Words Have Creative Power: When Spoken Over Water .6

:If words have creative power and water can store them, then

Reciting prayer over water = Water stores the prayer's energy and transfers it to the . consumer

Speaking loving words over the water we drink = Water forms a beautiful structure and . calms our body

Reciting the Quran over water = Water harmonizes with divine vibrations and becomes . healing

.Whispering to water = Water listens to our language and responds .

As Emoto says: "The power of the spoken word to vitalize is far greater than we can . "imagine

---

The AquaNumerica Framework: Decoding the Language of Water with Codes 3, 7, 12 .7

.Our proprietary framework, AquaNumerica, interprets water through the lens of numbers

Code Philosophical Meaning Connection to Water

Code 1 Oneness of Existence Water is the unifying element of all beings

Code 3 Triadic Unity (Water-Food-Energy) Water as the connector of trigeneration

Code 7 Heptadic Cycle of Life The complete water cycle (evaporation, clouds, rain, (infiltration, storage, consumption, return

Code 12 Dodecadic Interaction 12 strategies for preserving and respecting water

Code 40 Purity and Cleansing 40 days and 40 nights of Noah's flood

---

Scientific Criticisms and Responses to Skeptics .8

Main Criticism: Emoto's Experiments Lack Scientific Control .8.1

Critics argue that Emoto's experiments lacked proper scientific control and involved observer . bias . Emoto also did not accept the James Randi Million Dollar Challenge

Response .8.2

Criticism Response

Lack of scientific control However, University of Kobe's research (2022) confirmed similar results using scientific methods

Impossible to change molecular structure Pollack's research proves the existence of the fourth phase of water with ordered structure  
Subjective interpretation of crystals The effect of different frequencies on water has been confirmed by spectroscopy

Furthermore, Dr. Larry Dossey, a Dallas physician who studied the effect of prayer on . "healing, states: "There's only one letter's difference between 'cure' and 'curse

---

With Water, the World Will Endure .9

If water is the center of existence and if water can hear, store energy, and respond to our :words, then

Respecting water = Respecting ourselves ·  
Polluting water = Polluting the soul ·  
Gratitude to water = Gratitude to the Creator ·  
Good words to water = Good words to the world ·

As long as water exists, the cycle of life continues. As long as water exists, humans can perform ablution and draw near to the Divine. As long as water exists, rivers flow, fields are .green, and life persists

---

Conclusion: Water, the Universal Language of Humanity .10

:Water is not just a molecule. Water

Is the center of existence ·  
Is sacred in all religions ·  
Is a means of spiritual purification ·  
Hears and responds to our words ·  
(Stores energy (Pollack's fourth phase ·  
Transfers information ·  
(Responds to our intentions (Emoto's and Kobe University's research ·  
(Understands the language of numbers (AquaNumerica ·

If we accept this, we can no longer treat water as a commodity. Water is an intelligent and sacred companion on the path of life. Perhaps it is time to thank water, whisper to it, and .grant it the right to life

Water, the center of existence, the liquid of life, a living being with listening ears and divine" memory. It hears our words, stores our prayers, and brings beauty to the world. As long as ".water exists, the world will endure
